

1. Market Overview

A snapshot of mobile market size, penetration, and growth potential across four ASEAN countries.

Total Mobile Subscriptions

471M

Total Mobile Services Revenue

\$22.84bn

Highest Growth Potential

Vietnam — 5.7% CAGR

Highest Penetration Market

Thailand — 183%

Key Insights

All four markets exceed 100% mobile penetration, indicating a saturated landscape and multi-SIM usage behavior. Thailand is the most saturated market, while Vietnam combines high penetration with the strongest CAGR, suggesting stronger potential for service expansion, customer loyalty, and value-added offerings.

2. Network Infrastructure

A comparison of mobile network speed, quality, and coverage readiness across four ASEAN markets.

AVG Download Speed (Mbps)

69.37

AVG Upload Speed (Mbps)

16.07

Best Speed Ranking

Malaysia — #20

Network Coverage by Country in 2024

Median Download and Upload Speed by Country

Key Insights

Malaysia leads in network quality, supported by the strongest download speed and best global speed ranking. Vietnam and Thailand show competitive performance, while the Philippines lags behind, reflecting infrastructure and geographical challenges that may affect user experience and digital access.

3. Competitor Landscape

A comparison of key mobile network operators by market share, revenue, profit, and profitability.

Country

Vietnam

Total Revenue

\$10.6bn

\$2.2bn

AVG Profit Margin

13.6 %

Revenue, Profit and Profit Margin by Operator

Operator Market Share

Key Insights

Competitive dynamics vary across markets. Vietnam is led by Viettel with strong market share and profitability, while Thailand shows pressure from post-merger costs. In the Philippines, Dito has a small market share but unusually high profit margin, while Malaysia shows a more balanced competitive structure among major operators.
